

Marcos Baker

Flutter Developer · React · Python · Mobile & Full-Stack · AI Integration · International Remote Teams

+55 (31) 99107-0881 | marcos.baker@hotmail.com | Contagem, Brazil | linkedin.com/in/marcosbaker

PROFESSIONAL SUMMARY

Flutter and Full-Stack Developer with 5+ years delivering production mobile and web applications for international companies. Core stack: Flutter/Dart, React, and Python. Deep expertise in mobile state management (Riverpod, BLoC, MobX, GetX) and experience integrating AI-driven features into real-world apps. Led development of 10+ mobile applications end-to-end, from architecture to App Store and Play Store deployment. Fluent in English; experienced working asynchronously in multinational remote teams.

WORK EXPERIENCE

Flutter Developer — Genio Tech | Remote | Oct 2025 – Present

Genio AI and Anotar, AI-powered meeting recorder and transcription app

- Built **AI transcription pipeline** integrating speech-to-text APIs, enabling automatic meeting transcription across any platform
- Architected state layer with Riverpod and Firebase for a responsive, offline-capable mobile experience
- Optimized app performance: reduced cold-start time and bundle size through lazy loading and code-splitting
- Delivered feature releases on bi-weekly sprint cycles in a fully async remote environment

Technologies: Flutter, Dart, Python, Riverpod, Firebase, REST APIs, AI/ML integrations

Flutter Developer — PlayerUp | Remote | Oct 2025 – Apr 2026

PlayerUp — Coaching app for player development and session planning

- Developed session planning module with calendar integration and push notifications for athlete engagement
- Implemented Riverpod state management, improving code maintainability and test coverage
- Collaborated asynchronously with an international team across multiple time zones

Technologies: Flutter, Dart, Riverpod, REST APIs

Full-Stack Developer — Anykrowd | Remote | Mar 2025 – Oct 2025

International SaaS platform for event management and digital fan experiences

- Developed front-end features and REST APIs for a multi-tenant SaaS serving event organizers across European markets
- Built back-end services integrating payment and ticketing providers, handling high-volume concurrent transactions
- Improved page load performance and API response times, contributing to measurable UX gains
- Collaborated with cross-functional teams across time zones in a fully remote international environment

Technologies: Vue.js, Ionic, Laravel, PHP, JavaScript, REST APIs

Mobile Developer — Onfly | Remote | Apr 2024 – Feb 2025

Brazilian travel and expense management platform — one of Brazil's fastest-growing B2B fintechs

- Delivered **10+ new features** to a production Flutter app used daily by thousands of corporate travelers
- Applied MobX, GetIt, and GetX for scalable state management across a large multi-module codebase
- Reduced active bug backlog by **~30%** through systematic refactoring and debugging sessions
- Collaborated with product, design, and backend teams in 2-week Scrum sprint cycles

Technologies: Flutter, Dart, MobX, GetIt, GetX, REST APIs

Mobile Engineer — Itsy | Remote | Jun 2023 – Jul 2024

International startup for short-form video streaming and social media (Series A)

- Enhanced core video feed and social features; contributed to a **20%+** improvement in user retention metrics
- Migrated legacy setState architecture to Riverpod-based reactive patterns across the codebase
- Worked in a multinational fully-remote team across 3 continents, communicating entirely in English
- Participated in feature discovery sessions directly with the founding team, shaping the product roadmap

Technologies: Flutter, Dart, Riverpod, REST APIs

Mobile Developer — Prime Results | Hybrid — Belo Horizonte | Sep 2021 – Oct 2023

Brazilian tech consultancy delivering custom mobile solutions for enterprise clients

- Led end-to-end development of **10+ Flutter apps**, from client requirements to App Store / Play Store releases
- Managed full project lifecycles independently including architecture decisions, client communication, and delivery
- Standardized builds with Flutter flavors and CI/CD pipelines, cutting average release time by **~40%**
- Established Git branching conventions and mentored junior developers in best practices

Technologies: Flutter, Dart, Git, GitHub, CI/CD, REST APIs

Flutter Developer & IoT Intern — CSEM Brasil | Belo Horizonte | Oct 2018 – Aug 2021

Hardware and IoT research lab — electronic sensors for agroindustrial, industrial, and civil construction sectors

- Built a Flutter app for **real-time data acquisition** from flexible temperature sensors, visualizing live readings on mobile
- Integrated NFC communication between the mobile app and custom sensor hardware for data transfer and device identification
- Prototyped a Bluetooth-based tracking app for IoT cattle monitoring sensors — functional but not launched commercially
- Developed and tested electronic sensor prototypes using SolidWorks and 3D printing (ABS, PLA, flexible filament)
- Maintained electronic boards and performed sensor testing, including soldering and component-level debugging

Technologies: Flutter, Dart, NFC, Bluetooth, SolidWorks, 3D Printing, IoT, Electronic Sensors

EDUCATION

B.Sc. Systems Engineering — UFMG (Federal University of Minas Gerais) | 2023 – Present

Technician in Mechatronics — CEFET-MG | 2015 – 2018

TECHNICAL SKILLS

Primary Stack: Flutter, Dart, React, Python

State Management: Riverpod, BLoC, Cubit, MobX, GetX, GetIt

Mobile: iOS and Android deployment, App Store and Play Store publishing, Flutter Flavors

Back-End and Cloud: Firebase (Auth, Realtime DB, Firestore), REST APIs, Laravel, PHP

AI and Integrations: AI/ML API integration, Speech-to-Text, LLM-powered features

DevOps and Tools: Git, GitHub, CI/CD pipelines, Agile/Scrum
