## SUMMARY

Experienced Flutter Developer with a proven track record of designing, developing, and maintaining high-quality mobile applications for iOS and Android using Flutter and Dart. Proficient in advanced design patterns like BLoC, Cubit, Riverpod, and MobX, with expertise in integrating backend solutions using APIs. Skilled in Agile methodologies, system documentation, and cross-functional teamwork, I excel at creating scalable, efficient, and user-focused applications. My diverse background includes innovative solutions such as NFC-based data acquisition. Beyond Flutter, I have experience with VueJS and Laravel, Python for scripting and automation, and more extensive work with Java, primarily in building backend APIs. Passionate about leveraging technology to deliver impactful results.

## SKILLS

- Strong problem-solving
- Analytical skills
- Leadership
- English (B2)
- Brazilian Portuguese
- Spanish
- Flutter
- VueJS
- Laravel
- Agile
- Scrum
- Figma

## WORK EXPERIENCE

### anykrowd

Full Stack Developer • March 2025 - Present

- Develop and maintain the frontend using Vue.js and Ionic, as well as the backend with Laravel.
- Integrate APIs, manage state, and enhance the user experience.
- Create integrated applications.

### Onfly

Mobile Developer • April 2024 - February 2025

- Develop and maintain a Flutter-based app with new features and optimizations.
- Use MobX, GetIt, and GetX for effective state management.
- Debug and resolve issues to ensure app stability and performance.
- Collaborate with teams to deliver solutions for expense and travel management.
- Apply best practices in Flutter development to improve app quality.

### Itsy

Mobile Engineer • June 2023 - July 2024

- Flutter developer who enhances the Itsy app by new features and fixing bugs
- International Startup with a multinational team
- Video streaming and social media
- Riverpod for state management

### Prime Results - Gestão que transforma

Mobile Developer • September 2021–October 2023

- Lead the development of over 10 mobile apps using Flutter, building many from scratch and delivering high-quality solutions for clients on both App Store and Google Play.
- Oversee the entire app lifecycle, from concept to deployment, using tools like Git, GitHub, and Xcode to maintain quality and optimize performance.
- Implement state management solutions with GetIt, Bloc, and Cubit, and utilize flavors for standardized builds across multiple app versions.
- Collaborate with a team of developers to deliver scalable, maintainable, and user-friendly applications, staying updated with emerging technologies to improve processes.

## EDUCATION

### Bachelor in Systems Engineering

UFMG • 2023–Present

### Technician, Mechatronics

CEFET • 2015–2018
